In the event of a full or partial building evacuation it is paramount for an organisation to know who has safely left the building.

Where buildings are located in metropolitan areas it is common for the workforce and visitors to disperse quickly without following the prescribed evacuation procedures.

Facilities Managers are faced with inaccurate records of who may be left in the building.

All organisations have a duty of care to ensure the safety of their staff, visitors and contractors.

247i Roll Call is the simple answer.

Using a potent blend of technology and highly trained operators in an ISO17799 management framework **247i Roll Call** provides your staff, visitors and contractors with the facility to verify their safety with one simple phone call.

Your management can track the effectiveness of the evacuation with a combination of predefined and ad-hoc situation reports.

There is no need to activate the facility when you need it, the facility is on-line and ready for use 24 hours a day.

Using military style voice procedure and easy to use, yet highly secure, authentication questions the EMC Operator confirms your identity and can then provide you with the ad-hoc information you require.

This accurate situation report can be used to keep the emergency services, relatives, media etc... up to date.

In addition to personnel safety 247i can provide a managed notification service in the form of **247i Messenger** and various crisis support services such as managed audio conferencing, transportation, accommodation and catering services collectively known as **247i Logistics**.

In summary, **247i Roll Call** adds significant capability to your Health and Safety Policy.
